

Week 2 Tuesday

1. Which of the following attributes best describe a project select as many that fit)?

- A temporary
- B unique purpose
- C requires resources
- D has certainty, a clear and obvious set of objectives
- E enables value creation
- F sustains a business indefinitely

i a project is filled with uncertainty, with no clear or obvious set of objectives. Because a project is temporary, it does not sustain a [business...though](#) the results of the project might.

2. A successful project upon completion will have met scope, cost, and time goals.

- T True
- F False

3. In addition to scope, cost, and time, a fourth constraint determines the overall success of a project. What is the fourth constraint?

- A Efficiency
- B Team building
- C Quality
- D Enjoyment

i The quality of a project determines whether or not the customer is satisfied. Is a project successful if the customer is unhappy?

4. Chapter 1 of Schwalbe describes 10 knowledge areas that project managers must have skills in to be successful (e.g., scope management). List at least five more.

i Scope, schedule, cost, quality, resource, communications, risk, procurement, stakeholder, integration

5. In a few words or sentences, describe the difference between a program manager and a project manager.
